

## **SECONDARY TREATMENT ROUTES**

Meadowhead Depot in Coylton operates two secondary gritting routes confined to the north of the council area and treats C class roads and roads within residential areas.

Grangestone Depot in Girvan operates two secondary gritting routes, confined to the south of the council area and treats mainly C class roads.

### **Method**

Acting on advice received from the Council's weather service provider, secondary gritting routes will receive treatment during daytime hours at the discretion of the Duty Manager when resources are available.

A small number of roads within residential areas may be partly treated in order to optimise a predetermined routing system. This is not reflected in the abridged routes appended here.
