

Collection Calendar C

The Calendar shows collection days for your Blue, Green and Brown Bin. Please note that there will be a suspension of service on Brown bins in the winter months of December, January and February although you may arrange a collection during those months by telephoning the Recycling helpline.

Once the seasonal garden waste collection service is re-introduced from 1st March, your brown bin will be emptied once every four weeks from 1st March to 30th November. This will result in one collection day each month where a blue and a brown bin can be placed out for collection. Where you see a blue and brown shaded line this means that you can place out a blue and a brown bin for collection on your appointed collection day.
