

I fully support the above CAT.

This is an excellent club who need to expand their premises in order to maintain and progress with the high level of coaching and dedication that they provide towards the gymnasts and the wider community.

It will also promote general health and wellbeing by engaging participants in key physical literacy skills

It will help with establishing a base from which the club will be able to promote its objectives and aims. It will allow them to provide high level facilities and equipment on a constant basis, which in turn will help provide gymnasts the opportunity to benefit from involvement in gymnasts, maximising their own gymnastic potential with access to performance pathways.

Also regenerate an existing leisure facility in an innovative way which compliments the alternative sporting activities available in the local area.

I full support the above CAT and would be very happy to see this proceed.

Regards
